Why Cyprus Science University?

1. Due to the distinguished location of the university campus, where there is a peaceful and safe learning environment away from chaos.
2. There is an educational environment that provides multiculturalism with an international student profile.
3. Our university is intertwined with nature, with its smart and fun campus and innovative administration. New Generation University has adopted this concept.
4. With its international academic staff and infrastructure, modern, prestigious and high-quality education is provided.
5. Training and job opportunities in companies that conform to international standards.
6. Continuing scholarship opportunities throughout the education period.
7. Different and suitable accommodation options are offered.
8. International conferences, seminars and events.
9. High-quality, student-centered and world-class education with our motto "YouFirst".
10. A contemporary approach that integrates science with technology and real sector practices.

Chairman`s *Message*

Dear Students,

Our primary goal is; to raise graduates, who meet the needs and expectations of the 21st century, add value to their own society, make a difference that will enable them and their country to stand out in the global competition, and shape the future.

We are pleased to see you among us in the family of Cyprus Science University, which is highly qualified, respectful to its values, closely following the change and development in the global world, growing exponentially with its innovative, pioneering, and leading students, graduates, academics and administrative staff.

Dr. Selman ARSLANBAŞ

Rector`s *Message*

Dear Students,

The realities of the century we live in, with the awareness that being a student is not just a process that consists of lessons and studying, and that physical and personal development is important as well as professional knowledge and skills, during your education at our university, by considering your social lives with activities related to your interests, useful social spaces.

We created our Student Clubs, which produce various sports, cultural, artistic, and social activities, and created an environment that supports you to take part in the activities of student clubs by providing them with all kinds of opportunities.

Prof. Dr. Lale Ayşegül BÜYÜKGÖNENÇ

Mission

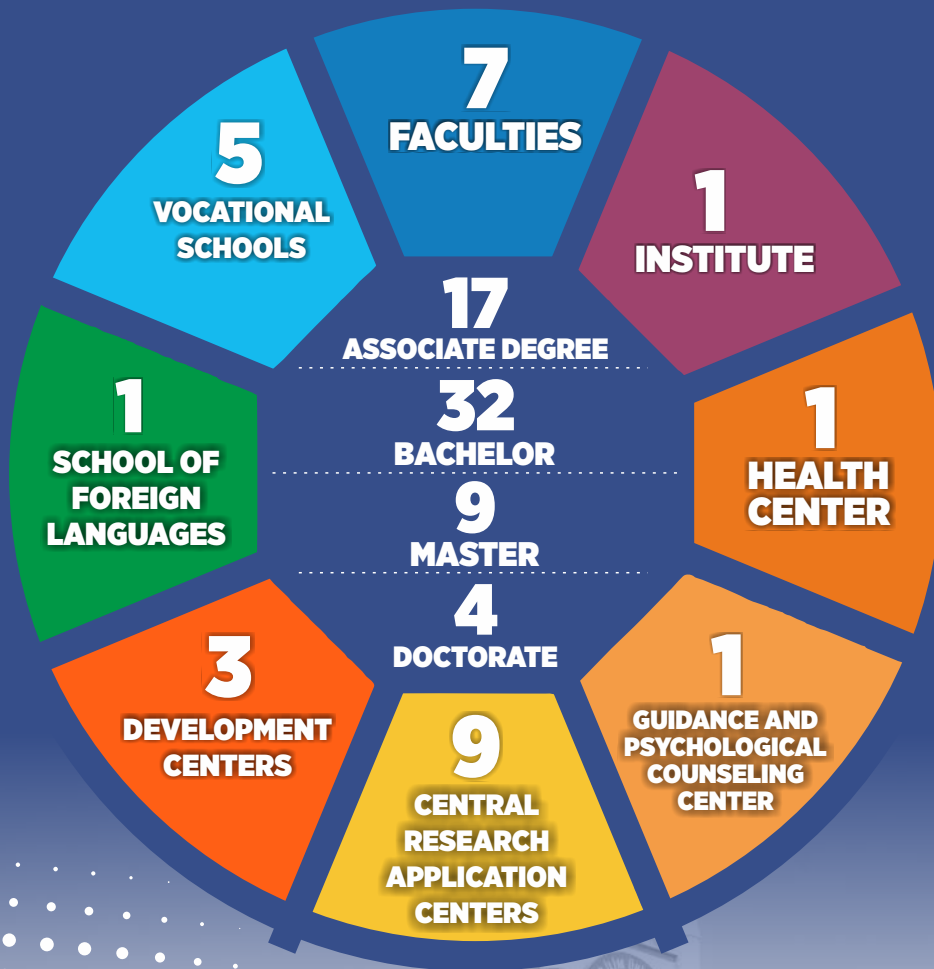

At Cyprus Science University; through academicians, students, and supported networks, we are able to make creative contributions to cultural, economic, scientific and technological elements that represent the different countries and regions of the world. To think creatively, to critically and solve problems, to respect individual differences in terms of personal and professional development. It has been tasked to become a leading, international and contemporary university with multi-lingual education, by giving importance to research, by keeping social values in the forefront and by producing science, culture, art and value for all stakeholders.

Vision

Cyprus Science University aims to become one of the leading universities in the region over the next 10 years. To achieve these goals;

- To be CSU dynamic and adaptable in the ever-changing and developing world.
- To supports high-quality learners and future generations' scientists and professionals through their international scholarship programs.
- To contributes to the students' development.
- To facilitates the modern educational process by using a wide and comprehensive infrastructure and to contribute to international developments as a vision.

Overview of our Faculties

FACULTY OF EDUCATION

The goal of our faculty is to educate contemporary teachers who are immersed in scientific and technological advancements and are able to reflect these abilities in absorbing teaching processes. The successful graduate will be able to conduct thorough research, possess creative qualities and to have a modern democratic mindset adaptable to all aspects of his or her working life.

FACULTY OF FINE ARTS AND DESIGN

The aim of educating architects, interior designers, and closely related other professionals (e.g. landscape architects), who are creative, research oriented, productive and skilfull in using current technologies, and also have both awareness about the global, social and environmental issues, and the required ethical values in the contemporary societies of twenty first century.

In light of the above vision of our Faculty, the main mission of our academic educational system can be expressed as the provision of high quality undergraduate level education at international standards for alternative degree programs which require strong interdisciplinary cooperation. Within this context, the main targets of the Faculty are to provide strong scientific theoretical knowledge, creative thinking, and practical skills to the students as well as to contribute to the scientific, artistic, and cultural development of society. In line with these targets, our Faculty aims at becoming a leading academic institution and a centre of excellence in the fields of fine arts and design at national and international level. To this end, we promise our students a creative and productive professional life, and bright future.

FACULTY OF LAW

Faculty of Law is aimed to raise qualified lawyers who have attained the knowledge of Turkish positive law besides the basic principles of international law with a perspective of comparative law as well as the capacity of employing at least one foreign language.

Our law school is also aimed to prepare our students for their future professional life with an educational understanding that includes both theory and practice through its outstanding academic staff starting even from the first semester.

Cyprus Science University Faculty of Law has adopted a multi-dimensional education program that includes international law and legal English lectures as well as moot court and clinical lessons besides mandatory law curriculum.

This will enable our students to acquire the professional skills to be eligible for government and private sector positions in addition to conventional law professions such as attorneys, judges, prosecutors, notaries and legal counsels. Consequently, we would suggest you all to be in contact with our academic staff perpetually during the whole educational life and utilize all academic and social facilities and wish the continuation of supreme success in your educational life.

FACULTY OF ECONOMICS, ADMINISTRATIVE AND SOCIAL SCIENCES

The priority of the Business Faculty is to educate and produce business people and scientists who can accommodate themselves to the changing dynamics of both local and global business structures within the framework of ethical values. Furthermore, the programs strive to provide the transmission of information and first-rate education through theory and practice. Therefore, the candidates who will graduate from our faculty are expected to escalate productivity in the private or public sector institutions, to be able to solve problems with good communication and relationship skills and to be entrepreneurial individuals with innovative goals. Equally important, the graduate is also expected to be equipped with the ability to constantly adapt to the modifying conditions of the business environment, to develop themselves in a competitive surrounding and to demonstrate respect for social values. The Department of Business Administration aims to develop research and application based-projects for problem-solving, to exhibit managerial and entrepreneurial skills grounded in theoretical information, to conduct researches in the field of technology and programs which are dominated by basic concepts and applications, to make comparisons in management and Organizational issues at local and global level. In addition, graduates are expected to approach Managerial issues with an objective and ethical mindset that can effectively evaluate and interpret proposals and develop practical solutions via critical managerial decision making processes. As a result, the program is designed to give graduates that can act in accordance with global standards, norms and social values in light of their developed critical thinking, verbal and written communication competence, numerical comparison abilities and analysis skills. Graduates will be qualified for employment in production management, marketing, human resources, sales, as well as finance and accounting positions in profit and non-profit institutions regardless of public or private sectors, national and international.

FACULTY OF ENGINEERING

Faculty of Engineering has been conducting research across a wide range of topics related to Nanotechnology , Networks, Artificial Intelligence smart systems, Pollution Control, Microelectronics and Power Generation, Biomedical and Acoustic Imaging to mention a few.

FACULTY OF HEALTH SCIENCES

The aim of our undergraduate programme is to train aspiring nurses with competences to provide first class care to those in need. This programme is offered in two languages: English and Turkish. Nursing is an occupation that provides services to protect and promote the health of individuals, family, and society. Nurses carry out these services by providing care, management, education, research and counselling.

FACULTY OF TOURISM

The main purpose of CSU Tourism Faculty is to provide international standard education that would make students compete with other tourism students all around the world. Offering managerial courses related to different divisions of hotel, including: front office, housekeeping, food and beverage, etc. as well as human resource management, marketing, accounting and finance in tourism industry, in order to grow successful graduates in tourism and hotel management field.

CSU Tourism Faculty also aims to develop individuals with entrepreneurial and professional skills that will enable students to generate knowledge and have the abilities to put their theoretical knowledge into practice after graduation. Hence, graduates of our faculty will have the education, abilities and skills to work in tourism sector.

Vocational Schools

SCHOOL OF FOREIGN LANGUAGES

School of Foreign Languages was established in order to provide quality education of English and Turkish as a Foreign Language to all students enrolled in graduate and undergraduate programmes. To this end, our mission is to equip our students with the necessary language knowledge and skills in order to be able to follow literature in their fields, communicate orally and in written form, and actively follow and participate in international events.

In addition, the aim of the language courses within the context of "Common European Framework of Reference for Languages" offered by the School of Foreign Languages is to help students to learn basic rules of the target language in order to acquire the necessary knowledge and skills which can help them to build their confidence and let them utilize the target language effectively. It also assists them to enhance their vocabulary and familiarize them with different aspects of various cultures.

VOCATIONAL SCHOOL OF JUSTICE

Justice Program, which provides vocational higher education at the associate degree level, aims to train the qualified legal personnel needed in the field of law and forensic services in our country in accordance with the curriculum prepared by considering the professional needs of today and the future, with the basic knowledge of law, knowing the application and following the technology. Our program takes it as a duty to raise graduates who absorb contemporary and universal values, who can update themselves, and who have gained the ability to apply them. In the Justice Program, which is an area with a lot of job opportunities, theoretical and practical information is given by considering the qualifications required by the judicial services. In this context, the curriculum of our program mainly consists of law lessons.

VOCATIONAL SCHOOL OF AVIATION

Air transportation has a very important role in meeting the need for transportation in today's globalized world. It is a vital sector of our society and economy. While the aviation sector is developing rapidly, the number of qualified personnel needed by the sector is increasing.

In line with this development, passenger relations, emergency rules, first aid, communication skills and the need for foreign-language equipped cabin crews are also increasing. Cyprus Science University Civil Aviation Cabin Services associate degree program aims to train highly qualified human resources that keep flight safety at the highest level, focusing on customer satisfaction, having effective communication skills, produce solutions and are highly qualified.

VOCATIONAL SCHOOL OF HEALTH SERVICES

The Vocational School of Health Services offer a wide range of possibilities for young people willing to take place among qualified workforce in the health sector. The courses and their contents have been formed in line with the demands and the needs of the healthcare sector. The aim of Vocational School of Health Services is, as required by a contemporary and democratic society, to educate individuals who provide education at an international level, constantly improve themselves and show examples, and can express their feelings and thoughts freely, transfer basic life skills to daily life, value differences, respect human rights, and do self-criticism and, finally, are creative, researcher, entrepreneur, willing to learn and healthy in terms of physical and mental aspects. The Vocational School of Health Services attributes great importance to practical learning as well as theoretical courses. All the students are provided with the opportunity to undergo practical training in a great variety of state and private institutions.

A photograph of three young people (two men and one woman) looking at a map outdoors. The woman on the left is wearing a denim jacket and a pink scarf. The man in the middle is wearing a grey shirt and a tan jacket. The man on the right is wearing a white jacket over a pink shirt. They are all smiling and looking at the map. The background is a blurred outdoor setting with buildings.

VOCATIONAL SCHOOL OF APPLIED SCIENCES

Our vocational school of applied sciences, which was established with the aim of providing an improved education with the integrated laboratory conditions of the TRNC, intensive practice and workshop courses, and sector trips, besides the theoretical education, accepts students with TYT points.

In our vocational school, which adopts as a priority task to provide our students with internship and on-site practice courses before graduation, our lesson plans have been arranged to meet their needs through meetings with our sector representatives.

INSTITUTE OF GRADUATE STUDIES

Today, graduate education has become a necessity in business and academic life. In this context, as a Graduate Education and Research Institute of the Cyprus Science University, we conduct a variety of graduate programs in Health, Social and Educational Sciences. In these programs, our main objectives are to train academicians for higher education institutions and to train qualified manpower for public and private sector organizations. Quality in education is the foremost principle of our Institute and in the graduate programs we carry out, our students are given qualified education by our faculty members using modern teaching methods and techniques. As a requirement of our programs, we have our students carry on research on various subjects during the thesis and project studies processes. Our primary concern is to educate students as knowledgeable and equipped, creative, productive, and innovative individuals in every aspect with access to the library, computer center, and databases at our university and to train our graduates as qualified manpower that is sought, preferred and primarily employed in the business world and universities.
